

Spartan Chemical Company, Inc.

Letter of Continuing Guaranty: **CONSUME ECO-LYZER**

Spartan Chemical Company, Inc., as the manufacturer of Consume Eco-Lyzer, guarantees that this product is safe and effective for use in food processing plants, including USDA inspected facilities, when used as directed on the product labeling and as directed in this letter.

Consume Eco-Lyzer is a quaternary ammonium chloride based neutral disinfectant cleaner fortified with viable bacterial spores. Consume Eco-Lyzer is formulated to kill odor causing bacteria, remove soils and leave non-pathogenic, enzyme-producing bacteria behind for residual control of nuisance odors. These bacterial spores are of Bacillus species and are normally considered to be non-pathogenic. However, the microorganisms in this product may pose a food spoilage problem if food is contaminated.

In food processing plants, this product is appropriate for limited use on floors in non-food processing/handling areas:

- Is registered with the US EPA as Reg. No. 5741-24.
 - Do not use this product in any food processing area of a plant.
 - Care should be taken to ensure that bacterial spores are not tracked or otherwise transported from treated floors into food processing areas.

Contamination of food with this product will cause spoilage. Do not contaminate food or food processing equipment with this product.

Carefully read and follow all statements on the labeling and Safety Data Sheet while using this product.

SPARTAN CHEMICAL COMPANY, INC.
